## 75th Anniversary Promises to be Memorable Event

It is customary for institutions and individuals to celebrate their anniversaries so it is only natural for The University of Alberta to commemorate the 75th Anniversary of the establishment of the University of Edmonton in 1907-08. Somewhat shorter celebrations of this sort took place in 1923-24, 1957-58, and again in 1967-68 in honor of the 25th, 50th, and 60th birthdays respectively, and are duly recorded in the University Archives.

The various components of The University of Alberta's 75th Anniversary celebrations have come together since the first meeting of organizers in October, 1978 giving shape to the slightly over a year-long program which culminates with the World University Games in July 1983. The slogan which we adopted for our first seventy-five years is "Scholarship and Innovation — What We Do Affects You."

The first of our events, an Egyptian Exhibition, "O! Osiris, Live Forever!," was launched on the last day of Spring Convocation 1982. It will continue through until Alumni Homecoming in October. Four other special exhibitions have also been scheduled for the period October 1982 through May 1983 at the Ring House Gallery. Our second major event occurred on 25 June when Mother Teresa of Calcutta, India, accepted an honorary Doctor of Laws degree from our retiring Chancellor, Jean Forest, before a packed Special Convocation at St. Paul Cathedral in St. Paul, Alberta.

On 6 July, following the installation of Peter Savaryn, Q.C., as the twelfth Chancellor of the University, a 75th Anniversary Banquet will be held at the Westin Hotel commencing

with a reception at 7:30 p.m. Greetings to the University from other parts of the post-secondary education community and other anniversary gifts will be acknowledged on this occasion.

While many specific anniversary projects are still in the final planning stages, and will be announced as details are confirmed, the following selected list of activities has already been organized to publicize our celebrations for the enjoyment of the University community and the general public:

- A major 75th Anniversary University display will be featured throughout July at such major summer attractions as the Calgary Stampede and the Edmonton Northlands Exposition.

- A series of artistic events including three outdoor evening band concerts and three chamber ensembles; a jazz concert; celebrations, by the Department of Music and guest artists, of Igor Stravinsky's 100th birthday and Brahms' 150th birthday; the premiere of Violet Archer's CBC work by The University of Alberta String Quartet; concert tours to Red Deer, Lethbridge, Medicine Hat, and Grande Prairie; three days of dance by the Orchestris Dance Group; and ten days of theatre at Studio Theatre.

- Two major symposia are scheduled, one on Human Evolution, 4 and 5 October 1982, and another on International Affairs 11 and 12 April 1983, and two interdisciplinary symposia of shorter duration, one on Science and Religion in January 1983 and another on Christian Marriage Today proposed by St. Joseph's College for 18 and

19 March 1983.

- Athletic events including basketball, hockey, volleyball, cycling, marathons, fencing, and a 75-member Wall of Fame project have been arranged by our Athletic Department.

- A 75th Anniversary Book, which is intended to be a permanent remembrance of the University's seventy-five years and is primarily pictorial in nature, will be available the first week in October.

- Five separate Faculty Open Houses will be held throughout the academic year, each featuring a different group of Faculties.

- In addition, several alumni and student events will be highlighted in the fall.

The enthusiastic involvement of President Horowitz, Chancellor Forest, and the Chairman of the Board of Governors in all aspects of the anniversary plans have been instrumental in ensuring a good start for our celebrations. Mention should also be made here of the contribution of Bill Preshing, who was Chairman of the 75th Anniversary Committee from its inception until the Fall of 1981.

The 75th Anniversary is your University's celebration. To make it truly successful will require your active participation and support.

Doug Burns  
Chairman  
75th Anniversary Committee

As we approach our 75th Anniversary Year, I extend my very best wishes to all members of our University community. The 75th Anniversary Committee has arranged for a large number of special events during 1982-83:

concerts, plays, exhibitions, displays, meetings, conferences, workshops, seminars, symposia and convocations. In addition, I encourage all units of the University (departments, faculties, student groups, and staff associations) to plan anniversary activities.

The celebrations will enable us not only to focus on our present accomplishments, but also to look back with gratitude to the many key people, from Premier Rutherford to President Tory on, who helped to shape this institution. The challenge now is to plan for the future with optimism and with vision. Through the financial campaign which will commence during the anniversary year we hope to convince governments, industry and labour, foundations, alumni and individual friends that we can be among the very best universities in this country and around the world. First, however, we ourselves must see this possibility.

Without embarrassment and with pride let us take advantage of this 75th Anniversary Year to tell others what we are and to indicate to the larger community what we can be helped to become. Let us explain why it is in the best interests of this province (including its other universities and the colleges) that we receive the special encouragement and support that will enable us to be among the best universities.

It is my good fortune to be serving as President during our 75th Year. I thank you for your continued support, which I value, and I wish each of you every success.

Myer Horowitz  
President

## Library Firmly Positioned in Front Rank of Canadian Research Centres

Eminent Chancellor

Today, in this Report to Convocation I will confine my remarks to the part of the University of greatest concern to me — the Library. Often the library is said to be the heart of the university. That heart for many years was a single room, Room 120 in the Arts Building. I came to the campus as part of the expanded staff for the magnificent new library building, Rutherford I, which some considered too large for a university of our size. (In 1951 it was the first new public building erected in Edmonton in twenty years. An attractive part of that new building was the mural done by H.A. Glyde, whom we honor today.)

In the time that has elapsed since then, it has been gratifying to watch our Library grow from a small undergraduate collection to one of the size and breadth capable of supporting the complex and sophisticated

research of a multifaceted University. Many people have had a part in building the collection, and not the least the University administration by its consistent support. Together our books, periodicals, and microforms make available to scholars some four million bibliographic units. At present inflated prices the replacement value of our Library is perhaps in excess of \$150 million, which places it in the first order as a research centre in Canada.

A research library can never stop growing, for the world's presses continue to produce books and new journals in increasing numbers. Modern scholarship has a voracious appetite for information. The demand for information is sparked by the rapidity of change brought about by science and technology, and by the compression of our planet into a global village into which electronics provides us all with ringside seats for dramatic happenings even in distant islands.

Our library buys material world-wide — indeed, nearly all of it outside of Canada — and so we are sensitive to every tremor of inflation, to every fluctuation in currency values. Our accounting office shudders every time the Canadian dollar drops a fraction of a cent in the New York money market. Though the inflation rate of scholarly journals has been particularly high in recent years, we have tried to retain our subscription list intact, but at the price of buying fewer new books. This past year our intake of book titles decreased by twenty-two percent which perhaps is not surprising when the minimum price of a scholarly book is at least \$30.

In times of economic stringency research libraries everywhere have sought to share resources through an effective inter-library loan

service. The four Alberta University Libraries are so linked, moving books by government courier. Of course our Library, as the strongest resource centre, is the chief supplier of materials in Alberta, and also throughout the other Prairie provinces.

Over the past three years Alberta Advanced Education and Manpower has made available from the Alberta Heritage Trust Fund grants to university and college libraries for the purchase of library materials. I would acknowledge how important our share, amounting to \$900,000 per annum, has been in enabling the Library to maintain a respectable acquisitions rate in an inflationary period. When the Heritage grant ended in April the University administration demonstrated its commitment to library support by bridging the hiatus in funding from its own limited resources.

In recent years our Library has benefitted also from the Government's Capital Fund known formerly as the 3AU Fund, now the 1980s Advanced Education Endowment Fund. Under this scheme gifts-in-kind, or money, and bequests from estates, are matched by the province dollar for dollar.

Research libraries, realizing that never again will they enjoy the affluence of the 1960s and early '70s, are preoccupied with preservation. A serious menace to library collections is the deterioration of the wood-pulp paper used in book publishing for over a century. In recent months the Canadian Archives has perfected a process by which acid attacks on paper may be neutralized. At some time in the next fifteen years our Library is likely to undertake a deacidification program for our two million books.

While libraries have remained quiet cloisters for readers, behind the scenes there has been frenetic

activity as staff adjust to the age of automation, to computer technology. For a decade and a half, our circulation control has been automated, and for some years certain aspects of our technical services as well. Our goal is to have an integrated automated management system, and to this end we are currently experimenting with a software package known by its acronym DOBIS. The National Library has the largest DOBIS installation in the country. We envisage a day when data interchange by computer between libraries will be commonplace. At present there is such a diversity of computer equipment and software in use that interchange is not possible. The National Library has a Task Group on Computer Communication Protocol working on the problem. We look forward here to the day when computer terminals scattered about the campus can access records of our library holdings.

As for *our* Library, for more than a year we have been taking advantage of catalogue records produced elsewhere for use here. This is possible by being on-line to the UTLAS facility in Toronto.

Any sense of euphoria which we may feel when contemplating the wonders of computers must be tempered by a remembrance of their record of failure, of computer down-time. Converting the world's information to machine-readable form will be expensive. For instance, in our Library a few years ago we had a project to replace each book card in our collection by a keypunch card. New technology will make it necessary to again change the record unit in each of our two million books. As a library administrator ruefully said recently, "technology has made our present and our future unaffordable."

Librarians are closely following the development of the laser optical videodisc because of its gigantic storage capacity. A double page of a book can be stored on a pinhead space. Half a million document pages can be stored in a disc which looks like a phonograph record. Will a mass of information be stored on discs retained in a few depository libraries and then be accessed by telecommunication, or will each library try to build up a stock of all the world's knowledge? In either case, the librarian will become a disc jockey.

A spokesman for the disc industry has suggested that, when whole libraries are compacted into a single shelf of optical video discs, the repository walls be papered with a pattern featuring bookshelves with colorful books so that bibliophiles may feel at home.

As a bibliophile I am confident of the survival of the book. Microform technology has been with us for nearly half a century, but microforms continue to be used only for highly specialized and less consulted material, not for the general readership. The book, if it is the right heft and type size, remains the best instrument for hand and eye to transmit information to the human brain.\*□

Peter Savaryn to be Installed on 6 July

## Apprenticeship For Chancellor a Lengthy One

On 10 June 1949, Peter Savaryn left the Greek ship *Nea Hellas* at Halifax and set foot on Canadian soil for the first time. It was a very important day for him and a fortunate one for his newly adopted land. In the years that followed, he carved out a fine career for himself in the legal profession and gave of himself generously in the pursuit of numerous community goals.

Peter Savaryn was born in Western Ukraine on 17 September 1926, where, besides Ukrainian, he learned to speak German, Polish, and Russian, to which he added English in Canada. After a year on an Ontario farm and another as a laborer and carpenter in Edmonton, he enrolled in pre-law at The University of Alberta in 1951 and was admitted to the bar six years later. In 1959 he established his own law office, and in 1974 he was appointed Queen's Counsel.

Anyone who has ever seen Peter Savaryn's appointments book knows that he seldom lunches alone and that he has very few free evenings. Over the years he has contributed much to a great many community organizations and projects, most often in an executive capacity. He has been President in Edmonton of the Ukrainian Canadian Committee, the Ukrainian Professional and Business Club, and the Ukrainian Youth Association Plast (Scouts), to which he owes his passion for hiking. Since 1963, he has been Chairman of the Unemployment Insurance Commission's Board of Referees. He is also on the Board of Directors of Heritage Savings and Trust, St. Josaphat's Senior Citizens Home and St. Michael's Nursing Home, and a member of the following service organizations: the YMCA, Canada West Foundation, Canadian Wildlife Federation, and the Alpine Club of Canada. With history his principal hobby, he has been a frequent

contributor to the Ukrainian press. In the last decade, he has played a large role in the development of the Ukrainian Cultural Heritage Village, twenty-five miles east of Edmonton on Highway 16, and Ukrainian-English bilingual education. He is also a member of the Fort Edmonton Historical Foundation.

"The advancement of learning is the highest commandment," wrote Maimonides. Such is the motto of the Canadian Foundation for Ukrainian Studies, placed there by Peter Savaryn, when he assumed the presidency in 1979. His interest in post-secondary education is deep and abiding. From 1972 to 1978, he served two terms on the Board of Governors and the Senate of The University of Alberta. He also contributed much to the creation of the Alberta Heritage Medical Research Foundation and to the establishment on campus of the Canadian Institute of Ukrainian Studies.

His participation in politics has been equally distinguished. He has been President of the Alberta Progressive Conservative Association and Vice-President for Alberta of the National Progressive Conservative Party. He has served as chairman of a great many PC committees, meetings, and seminars, and has been an indefatigable fund raiser for numerous political and charitable causes.

His apprenticeship for the post of Chancellor of The University of Alberta has therefore been a lengthy one. Through hard work, careful planning, continuous learning, and a keen desire to assist his fellow man in realizing clearly defined objectives, Peter Savaryn has been a model of dedicated service to young and old alike. By reaching out and sharing his life with others, he has helped to create a better climate or atmosphere in which to sustain and develop Canada's multicultural society.

*page three, Folio, 1 July 1982*

For his efforts, he has been honored with numerous well-deserved awards. He is an honorary citizen of Winnipeg, and an honorary life member of Edmonton's Ukrainian Professional and Business Club. He is a recipient of the Schevchenko Medal from the national executive of the Ukrainian Canadian Committee, the Badge of Eternal Fire (in gold) from Plast's national executive, and the Citation for Meritorious Service from the credit union movement in the Edmonton district.

As Chancellor, Mr. Savaryn will be assisted and encouraged by his wife, Olga, and their three children, Halia, Michael, and Vera, all of whom graduated from The University of Alberta and studied music at the Royal Conservatory in Toronto.

Above all, Peter Savaryn is a friendly and approachable person who recognizes the importance of a continuous dialogue between the University and the society it serves. He is an eternal optimist who brings to his task considerable experience in building consensus, gleaned from years of leadership in academic, financial, administrative, professional, political, religious, and multicultural affairs.

The University is fortunate to have him as Chancellor, even though characteristically he would insist that the good fortune is his — part of the same good fortune that gave him a new lease on life in Canada many years ago.

All who love The University of Alberta wish him well! \*□

*\*The preceding article was contributed by Manoly R. Lupul, Professor of Educational Foundations and Director of the Canadian Institute of Ukrainian Studies.*

## And the Winner Is...

For those of you who have been waiting patiently, wait no more. The results of *Folio's* first SEM Contest are in, the answers judged, and the skill-testing questions answered.

And so, without further ado... to the winners.

The winner of the prize for the first correct answer received by *Folio* is John Buckland-Nicks, a Research Associate in the Department of Zoology. And his answer? That's right: "a grain of salt."

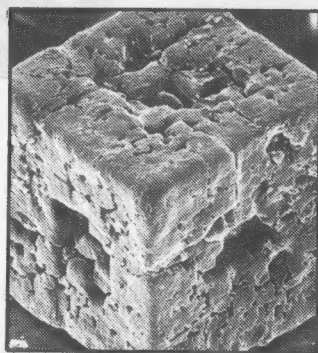

The winner of the prize for the most original answer is Clive Carter, Electrical Distribution Manager for Physical Plant. Taking no chances, Mr. Carter sent in this response: "A grain of salt; assaulted grain; a cubic's rube; an engineer's brain (very unCivil); Convention Centre (revision 593)."

When contacted, Mr. Carter said "I'm absolutely amazed... and naturally, I'm thrilled."

The two winners will each receive packets of salt, suitably engraved.

*Folio* would like to thank the many people who entered the

page four, *Folio*, 1 July 1982

SEM Contest. There were a number of correct answers, and a variety of original ones. The positive response to the contest has convinced *Folio* to make it an annual event.

On a more serious note, it was brought to the attention of *Folio* that the picture used in the SEM Contest of 3 June was not taken with a University Scanning Electron Microscope; rather, it was taken with one identical to the new SEM 250. The picture was originally supplied to the Department of Entomology by the Cambridge Instrument Company, supplier of the new SEMs. □

## Of Summer and the Last Post

Summer is upon us again and while the University maintains its constant beehive-like activity (*si magna licet componere parvis*), many of its workers are away collecting, as it were, pollen in the fields of scholarship. Such a state is especially true in academic departments where staff have an obligation to engage in research, often in other parts of the country or the globe. Of course, there are still those who remain at their posts and it is for their benefit that this brief note is written.

Pity the poor receptionist who has no idea where Professor X is nor any idea when that professor will return. What must the receptionist answer? "I'm afraid that Dr. X is not around at the moment. Shall I leave a message?"... "No, I'm afraid Professor Y isn't in either"... "No, I don't know when either is coming back. Why not try again in late August?"

Please let your receptionist and secretaries know where you are, when you will return and, if the matter is sufficiently urgent, how you may be contacted.

Why is Community Relations concerned? For the simple reason that frustration on the part of reception and secretarial staff has led in recent times to such responses as "Oh, it's summer. There's no one around." Or, "Sorry, we've shut down this week, I mean no one is in."

Is that the impression that we want to give? Allow receptionists and secretaries to give appropriate answers, let them know where you are, what you are doing, and when you will be available.

"Oh, sorry she's away researching over-grazing by sheep in southern Patagonia but she'll be in next Tuesday. If you want to call, her telephone number is..." A much more satisfying response. □

## Elizabeth Wallace, 1888-1982

Elizabeth Wallace, wife of the late Robert Wallace, second President of The University of Alberta, died on 20 June in Kingston, Ontario. She was 94.

Born in Scotland and educated in Edinburgh, Mrs. Wallace met her future husband while a student at the University of Edinburgh. They came to Canada in 1910, Dr. Wallace as Professor of Geology at the University of Manitoba. In 1928 Dr. Wallace was appointed President of The University of Alberta, replacing Henry Marshall Tory.

During her eight years as "first lady" of the University, Mrs. Wallace was actively involved in the University Women's Club,

and was founder of the University's first drama group.

According to Mrs. Morden Long, wife of Morden Long, Professor of History during Dr. Wallace's term as President, Mrs. Wallace was "a very warm and understanding woman, and a very fine and popular President's wife."

The Wallaces moved to Kingston in 1936, and Dr. Wallace was Principal of Queen's University until 1951. Mrs. Wallace's popularity at this University was echoed at Queen's where she was referred to as "the best thing Dr. Wallace brought with him to Queen's." □

## Full COMCAT Arrives in Library

The University Library has expanded its microform catalogue (COMCAT) to include all records of books catalogued from 1974 to 1981. The expanded COMCAT is now available in all divisional libraries on motorized ROM microfilm readers. Reader stations will consist of four ROM readers: one for the author list, another for the title list, and two

to accommodate the large subject list.

Existing microfiche reader stations have been expanded to include the full 1974 to 1981 COMCAT in microfiche format, as well as the 1982 supplements. Current year supplements will be available in microfiche only, and will be updated every two months. The full COMCAT will

be brought up to date annually.

Readers previously have searched the card catalogue first and then, for the most current material, have checked the COMCAT. The introduction of the full COMCAT, and its supplement containing well over 400,000 records of the Library's acquisitions over the past eight years, will necessitate a change to

this approach. Material acquired before 1974 but recatalogued since then will also appear only on the COMCAT. Readers, especially those seeking the most current material, should now search the COMCAT *first*, and the card catalogues only if they have not found the items they need in the COMCAT or if they are conducting a search including earlier material. Catalogue cards duplicated in the full COMCAT will be removed during August.

The full COMCAT will mean much more convenient access to the Library's collection received after 1973. At present, for example, there is only one main subject catalogue to the Library system (in the Humanities and Social Sciences Library) and only two main author/title catalogues (in the Humanities and Social Sciences Library and in Cameron Library). Each divisional library, such as Education or Law, contains card catalogues for its own collection only. Library users consulting those catalogues remain uninformed of relevant material in other libraries on campus.

With the full COMCAT, the University Library's entire collection catalogued from 1974 to the current year can be searched from any divisional library. By the autumn of this year, full COMCATs and supplements will be available to teaching departments at a nominal cost; then, the Library's current collection can be searched from department offices.

Books received and catalogued before 1974 will still have to be searched via the card catalogues, however. Converting these manual records to a computer database and thence to COM formats is still in the distant future.

Library staff will be happy to introduce readers to the new full COMCAT and to help them feel comfortable with the new library catalogue formats. □

## University of Alberta Library Hours Summer Session 1982

## Feeder's Day at the Farm

On Thursday, 10 June, the University Farm (officially known as the Edmonton Research Station) welcomed more than 300 participants to the 61st Annual Feeder's Day sponsored by the Department of Animal Science in the Faculty of Agriculture and Forestry.

Farm Manager Hugh Campbell and staff executed some well-planned manoeuvres in the Dairy facilities to accommodate the day's proceedings. A massive bale shed was transformed into an impressive lecture theatre complete with audio-visual equipment, a gigantic screen, and raised seating. Cars were parked in neat rows over in the clover; lunch, with its main dish of bull's beef, was served on the lawn in front of the Dairy Barn. Throughout the day, participants could relax or converse over a cup of coffee from the Dairy's own Coffee House and, if a further break was desired, could hop on a waiting mini-bus for a trip to campus and a tour of the new Agriculture/Forestry Centre. All Farm sections were open for viewing with guided tours of the Metabolic Unit being conducted throughout the day.

The day's proceedings, chaired

by R.T. Berg, Chairman of the Department of Animal Science, were officially opened by J.P. Bowland, Dean of the Faculty of Agriculture and Forestry. The morning program included the following lecturers and topics: M. Makarechian, Beef Cattle Research at Kinsella; L.P. Milligan, Forage Evaluation for Ruminants; G.W. Mathison, B Vitamins in Ruminant Nutrition; and M.A. Price, The Influence of Management and Behavior of Feedlot Bulls on Meat Quality.

Greetings from J.G. Kaplan, Vice-President (Research) preceded the afternoon sessions which featured the following: R.J. Christopherson, Effect of Cold Environment on Farm Animals; R.J. Hudson, Agricultural Potential for Wild Ruminants; F.X. Aherne, Feeding and Management of Suckling Pigs; J.J. Kennelly, Protein Nutrition of Dairy Cattle; A. Shires, Production of Roaster Chickens; and W.C. Sauer, Digestion and Amino Acid Availability for Pigs.

Traditionally, Feeder's Day was the vehicle through which the University (Department of Animal Science) extended its research results directly to the

farming community. Today it is more of an intermediary phase through which the University communicates its research (and results) to extension people who in turn pass it on to the farmer. However, as Dr. Berg is quick to point out, there still continues to be a fair representation from the farming community among the

participants at Feeder's Day; and the Department welcomes the challenge to communicate their science at a level that everyone can understand and benefit from. Judging by the reactions of the participants, the 61st Annual Feeder's Day was an unqualified success on all counts. □

---

### Patience Please

## Locker Changes Prevalent in the Physical Education and Recreation Building

In order to provide a more economic and efficient use of space and staff, and to be able to provide a better service to the future users of the Physical Education and Recreation Building and the new Fieldhouse, the locker rooms are undergoing major reconstruction.

In September 1982 all females will be assigned space in the new East locker room. Long lockers and half lockers will be brought in over the next few years replacing the inadequate small lockers already in existence. All males will be assigned space in the new West locker room.

The new equipment room will be accessible equally to males and females with the consequence that towel exchanges will have to occur when dressed. It is proposed to introduce a token system to minimize the inconvenience a dry towel exchange would cause.

During the construction phase the majority of users of the facility will be inconvenienced and your patience is requested. For part of the time access to the West pool will be through the "old" female locker room and all users will be restricted to small lockers.

You are encouraged to discuss the proposed plans with the equipment room staff and apologies are extended for the inconveniences created.\* □

\*G.M. Elliott, Assistant to the Dean, Faculty of Physical Education and Recreation, supplied Folio with the foregoing information.

*people*

---

## Research Grants and Contracts Office Announcement

Gordon Holmes, Research Grants and Contracts Officer, wishes to make it known that, effective 1 July 1982, the Research Grants and Contracts Office will no longer be responding to the Faculty of Graduate Studies and Research but to the Office of the Vice-President (Research).

In this connection, he asks that all Deans, Directors, Department Chairmen, and Research Directors please ensure that all mail, research grant applications,

contract proposals, etc. be sent directly to the Research Grants and Contracts Office, 3-31 University Hall. "Any necessary signatures required on behalf of the President of the University will be obtained by us, as in the past. It is therefore imperative that these come to us *directly*. We will continue to need your cooperation in supplying our office with a copy of every application." □

On 9 June R.L. Busch (Slavic and East European Studies) presented a paper on Gogol's "Nevsky Prospekt" during the meeting of the Canadian Association of Slavists at the Learned Societies Conference.

Carla Cumming was recently appointed Editor of the Riel Project. A graduate of The University of Alberta (BA 1980), Miss Cumming will be responsible for preparing for publication the various volumes of Louis Riel's

writings as they are submitted to the University Press by the Volume Editors. With four different Volume Editors working relatively independently from one another on the Riel Project, her role will be to ensure consistency for the entire publication.

**J.P. Das** (Centre for the Study of Mental Retardation) organized a symposium on reading disability at the recent convention of the Canadian Psychological Association in Montreal. He presented a paper at the same symposium written jointly with **Gay Bisanz**, the Centre's Research Associate, and **G. Mancini**, a graduate student.

The Association for Teachers of English has recently recognized a thesis prepared by **Anne Brailsford**, a graduate of the Department of Educational Psychology, as the best in Canada. The thesis was jointly supervised by Dr. Das and **Fern Snart**. Dr. Brailsford successfully developed a method of remediation for improvement of comprehension in children with reading difficulties.

**President Horowitz** made a presentation and was a discussion leader at a Conference on Research and Development in Teaching and Teacher Education sponsored by the Faculty of Education at the University of British Columbia on 16 and 17 June.

On 18 June he addressed the Annual Conference of the Canadian Association for University Continuing Education which was held in Vancouver.

**David Norwood**, Office of the Vice-President (Finance and Administration), has been appointed Assistant Vice-President in that office.

A graduate of this University (BA 1968; MA 1970), Mr. Norwood taught at the University of Toronto for three years before joining The University of Alberta's Publications Office (now a part of Community Relations) in 1973. Mr. Norwood was appointed Assistant to the Vice-President (Finance and Administration) in 1975 and was

promoted to Executive Assistant in 1979.

His appointment to the new position of Assistant Vice-President (Finance and Administration) is effective 1 July.

## publications

**Kosinski, L.A. (Geography):**  
International Migration of Yugoslavs During and Immediately After World War II. *East European Quarterly*, Vol. 16, No. 2 (June 1982): pp. 183-198.

## service information

All information to be included in this column must reach the Office of Community Relations by 9 a.m. the Thursday prior to publication.

## Coming Events Lectures and Seminars

**Theoretical Physics Seminar**  
5 July, 3:30 p.m. R. Dutt of the Visva-Bharati University in India will speak on "Analytical Treatment of Screened Coulomb Problems." 631 Physics Building.  
5 July, 3:30 p.m. M. Weinstock, Department of Anatomy, McGill University, will discuss "Studies on Dentine Matrix Elaboration by Odontoblasts." 4069 Dentistry/Pharmacy Centre.

## Departments of Anatomy and Oral Biology

6 July, 4 p.m. Dr. Weinstock will present a lecture on "Freeze-fracture Studies on the Odontoblast, With Emphasis on Gap Junctions." 6-28 Medical Sciences Building.  
7 July, 3:30 p.m. J.R. McConnell of the Dublin Institute for Advanced Studies will present a lecture on "Rotational Brownian Motion and Physics-Chemical Processes." 631 Physics Building.

## Exhibitions

### Ring House Gallery

Until 3 October. "O! Osiris, Live Forever!" An exhibition on the scientific investigation of mummification. The exhibit is jointly organized by University Collections and Manchester University Museum, England.

## Non-Credit Courses

### Devonian Botanic Garden

#### Plants the Native Peoples Used

Date: 3 July. Fee: \$10. Learn how native tribes used plants for food, medicine, and other necessities while touring the collection with an experienced guide.

#### Useful and Ornamental Herbs

Date: 10 July. Fee: \$6. Tour the formal Herb Garden and see prime examples of the whole plants behind the food and spices in your kitchen.

## Computing Services

### Client Training Sessions

Computing Services is taking registrations between 8:30 a.m. and noon for the following non-credit courses. For further information, please telephone Information Services at 432-2463, or come to 352 General Services Building.

### Introduction to Computing

Course number: 664. Date: 12 July. Time: 11 a.m. to 1 p.m. Fee: \$5. Prerequisites: No previous computing experience, but familiarity with a keyboard is required. Place: 351 GSB.

### Introduction to the BMDP Control Language

Course number: 743. Date: 27 and 30 July. Time: 2 to 4 p.m. Fee: \$5. Prerequisites: The "Data Preparation for Statistical Packages" seminar is recommended. "Introduction to Computing" or a knowledge of MTS is required. Place: 328/351 GSB.

### MTS and Editor Fundamentals

Course number: 682. Date: 14, 16 July. Time: 11 a.m. to 1 p.m. Fee: \$10. Prerequisites: "Introduction to Computing" or equivalent working knowledge of a DECwriter terminal and MTS. Place: 351 GSB.

### MTS Overview

Course number: 708. Date: 13, 15 July. Time: 10 a.m. to noon Fee: \$10. Prerequisites: "MTS and Editor Fundamentals." Place: 328/357 GSB or 328/327 GSB.

### Data Preparation for Statistical Packages

Course number: 741. Date: 26 July. Time: 1 - 4 p.m. Fee: \$5. Prerequisites: "MTS and Editor Fundamentals." Place: 328 GSB.

### Introduction to the SPSS Control Language

Course number: 745. Date: 29 July. Time: 1 - 4 p.m. Fee: \$5. Prerequisites: The "Data Preparation for Statistical Packages" seminar is recommended. "Introduction to Computing" or a knowledge of MTS is required.

## Notices

### J.B.S. Haldane Research Centre

As many readers are aware, J.B.S. Haldane was an internationally-known biologist,

statistician, and geneticist from Great Britain who took up, a few years before his death, the citizenship of India.

T. Antony Davis, former Director of the Crop Science Unit at the Indian Statistical Institute, Calcutta, and Advisor to Indonesia under a U.N. assignment, has recently set up the above Research Centre in Nagercoil, Tamil Nadu, India. The objective of this Centre is to do theoretical and applied research in agricultural, biological, and social science related issues through model farms, model industrial units, etc. Dr. Davis has put his own life-savings into the establishment of this Centre. The Centre needs funds to pass through the initial teething stages. Donations are welcome and will help the cause for which the Centre stands.

Please send your donations by means of bank draft or money order in favor of the Haldane Research Centre to the Director, J.B.S. Haldane Research Centre, Carmel Nagar, Nagercoil, 629002, Tamil Nadu, India.

### Assistance for Insomniacs

Do you (1) take longer than a half hour to fall asleep, (2) sleep less than six hours a night, (3) wake too early, or (4) wake up more than twice a night? There is a clinical sedative trial underway. Break the cycle. Limited numbers accepted. Telephone Dianne at Research Clinic, Clinical Sciences Building, 432-6480 or 432-6599.

## Surplus Equipment

The equipment in this column is available only to University Departments with University Administered Funds. For further information about the purchase of equipment or the disposal of any of your department's surplus equipment, contact Bonnie O'Dwyer or Roy Bennett, telephone 432-3208.

- 1 - Exide Uninterruptable Power Supply consisting of the following components:
    - Exide Static Inverter, Model 120/3, 7F, 105-140V, 3.7KVA, 30 amps.
    - Exide Auto Transfer Switch, Model 120/2551-R, 120V, 25 amps.
    - Powertronics Battery Charger, Model MO 707, Input 120 VAC 64 amps, Output 125 VAC 35 amps.
    - 20 only 6VDC Exide Batteries, Lead Acid 144AH
- For further information, please call I. Zainul at 432-2101.

## Positions Vacant

The University is an equal opportunity employer but, in accordance with Canadian Immigration requirements, these advertisements are directed to Canadian citizens and permanent residents.

### Administrative Officer Department of Computing Science

Applications are invited for the position of Administrative Officer, Department of Computing Science. The Department of Computing Science is currently involved in an expansion program to meet increased student enrolments.

**Duties:** The Administrative Officer reports directly to the Chairman and is primarily responsible for budgets (operating, capital, and trust), personnel management, student registration and timetabling, and is secretary to various Department committees. Liaison with other departments is also an important function.

**Education:** BSc (minimum). **Salary:** \$26,170 to \$39,250. **Expected Appointment Date:** 1 September 1982. **Closing Date for Applications:** 20 July 1982.

Applications, including a resume and the names of three references, should be sent to: Mr. D.E. Williams, Finance and Planning Officer, Faculty of Science, CW223 Biological Sciences Building, The University of Alberta, Edmonton, Alberta, T6G 2E9.

### Non-Academic Positions

To obtain further information on the following positions, please contact *Personnel Services and Staff Relations, 2-40 Assiniboia Hall, telephone 432-5201. Please do not contact the department directly. As positions are filled on an ongoing basis, these vacancies cannot be guaranteed beyond 25 June 1982.*
